

MANISH KUMAR SINGH

AI GENERALIST · AI RESPONSE EVALUATION · RESEARCH · CONTENT QUALITY · SOFTWARE ENGINEER

Bengaluru, India · manishsingh.core@gmail.com · +91 8102468734 · LinkedIn · Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 2 years of professional experience in enterprise web application development, combining strong analytical reasoning, research, written communication and attention to detail with a broad generalist knowledge base. Experienced in interpreting requirements, analyzing application behavior, identifying inconsistencies, researching technical issues and communicating clear, structured conclusions.

Seeking AI Generalist and AI Training opportunities involving AI response evaluation, preference ranking, factuality and relevance assessment, instruction-following review, rubric-based evaluation, response improvement, research and content quality analysis. Strong English and Hindi communication skills with an ability to evaluate diverse topics objectively, explain reasoning clearly and work independently within detailed quality guidelines.

CORE AI EVALUATION CAPABILITIES

AI Evaluation: AI Response Evaluation · LLM Output Evaluation · Preference Ranking · Response Quality Assessment · Instruction Following · Factuality · Relevance · Completeness · Reasoning · Hallucination Detection · Prompt Evaluation · Rubric-Based Evaluation · Content Quality Assessment · Error Identification · Response Rewriting
Research & Reasoning: Online Research · Fact Verification · Comparative Analysis · Critical Thinking · Logical Reasoning · Evidence-Based Evaluation · Information Quality · Root-Cause Analysis · Quality Assurance · Attention to Detail · Content Research
Language & Content: English · Hindi · Reading Comprehension · Writing · Editing · Grammar · Naturalness · Translation Quality · Tone · Cultural Context · Response Improvement
Technical Evaluation: React · JavaScript · TypeScript · C# · .NET · ASP.NET Core · .NET Web API · Entity Core Framework · SQL · REST APIs · Web Applications · Git/GitHub · Swagger

PROFESSIONAL EXPERIENCE

Software Engineer | LTM — Bengaluru, India · Dec 2024 – Present

- Analyze application requirements, workflows and expected outcomes to identify functional inconsistencies, edge cases and implementation gaps.
- Investigate application issues through structured analysis, documentation review, API inspection and problem decomposition, translating findings into clear conclusions.
- Review UI workflows and application behavior for correctness, consistency, usability and adherence to defined requirements.
- Evaluate alternative implementation approaches and trade-offs based on requirements, maintainability and user impact.
- Work independently on structured engineering tasks while maintaining attention to detail, quality standards and delivery timelines.
- Collaborate with QA, backend developers, product stakeholders and cross-functional teams in an Agile environment, communicating findings clearly.
- Apply systematic debugging and quality-focused validation while supporting enterprise web applications built with React, TypeScript/JavaScript and .NET technologies.

SELECTED AI EVALUATION PROJECTS

LLM Response Quality Benchmark Designed a structured evaluation rubric to compare AI-generated responses across accuracy, relevance, completeness, reasoning, instruction adherence and clarity; documented preference judgments with evidence-based rationale.	Response Evaluation · Ranking · Rubrics INDEPENDENT PORTFOLIO STUDY
AI Factuality & Hallucination Audit Conducted research-based audits of AI-generated claims across technology, sports, Indian context and general knowledge; classified unsupported claims, factual errors and misleading confidence.	Fact Checking · Research · Hallucination INDEPENDENT PORTFOLIO STUDY
English–Hindi AI Language Evaluation Developed bilingual evaluation examples covering meaning preservation, grammatical correctness, naturalness, tone, cultural context, translation quality and code-switching.	English · Hindi · Language Quality INDEPENDENT PORTFOLIO STUDY
AI Technical Response Evaluation Evaluated AI-generated explanations and solutions involving React, JavaScript, TypeScript, SQL and .NET for technical correctness, completeness, edge cases and practical applicability.	Technical QA · Software · Reasoning INDEPENDENT PORTFOLIO STUDY

TECHNICAL BACKGROUND

Web: React · Angular · TypeScript · JavaScript · HTML · CSS | Backend: C# · ASP.NET Core · .NET Web API · Entity Framework Core · REST APIs | Data: SQL Server · PostgreSQL / Supabase | Tools: Git · GitHub · Postman · Swagger · Supabase · Agile/Scrum

EDUCATION

B.Tech, Computer Science & Engineering — Haldia Institute of Technology, 2020–2024 · 8.54 CGPA

LANGUAGES & PROFESSIONAL STRENGTHS

Languages: English · Hindi | Strengths: Critical Thinking · Attention to Detail · Structured Decision Making · Research · Quality Assurance · Clear Written Communication · Independent Work · Guideline Adherence
